**Date:** 7/14/99

**Re:** Western Regional Emergency Medical System, Adult and Pediatric Advanced Life Support Protocols

---

As you are probably aware, the latest revision of the Western Regional Emergency Medical System, Adult and Pediatric Advanced Life Support Protocols have been released. These protocols allow EMT-CCs and EMT-Ps to administer aspirin as a medical treatment option if approved by the agency's medical director. We ask that you add aspirin to your drug boxes as soon as possible since we believe that early administration may be beneficial.

Please also notify all of your EMT-CCs and EMT-Ps regarding this matter. I thank you in advance for your cooperation. Feel free to contact me if you have any questions.
