

## PROJECTILE POINT TYPES

### Neverending DRAFT Bibliography

INTRODUCTION: This bibliography began with an internet message from Hugh Jarvis to the Arch-L list in the summer of 1994 with about a dozen references, and I became compulsive. These references include some from the "grey market"... (i.e. tend to have prices listed but also can be good for type coverage). The collectors books with prices are also valuable aids for the archaeologist prosecuting an ARPA case in establishing commercial value. In order to provide some contextual framework, references are included which focus on: breakage, dating, descriptive systems, fluting, form, function, hafting, measurements, notching, and reshaping. This bibliography references at least 6 Ph.D.Dissertations and 13 Master's Thesis'. It also includes references on prehistoric and historic projectile points made from copper and iron. As a good cautionary reminder "Scholars..... should not be enslaved by static typology" (Wilke & Flenniken, 1991).

Some locations of projectile point information on the internet are included as appendix A at the end of this bibliography.

#### ACKNOWLEDGMENTS

I would like to thank the following individuals for their help in this little compilation exercise (especially Hugh): Bill Adams (Adams & Associates, OR), Samuel O. Brookes (National Forests in Mississippi), C.K. Chandler (San Antonio), Alan Dorian (Kisatchie National Forest, LA), Meeks Etchieson (Ouachita National Forest, AR), Keith Doms (University of Delaware), Jack D. Holland (Buffalo Museum of Science Lithic Laboratory), Hugh Jarvis (University at Buffalo, SUNY, N.Y.), Roger Moore (Moore Anthropological Research, NM), Juliet Morrow (Iowa Office of State Archaeologist), Dan F. Morse (Arkansas Archeological Survey), Tim Rast (Memorial University of Newfoundland), Andrea Repp (National Forests in Florida), and Jack Stewart (Arkansas Archeological Survey). My special thanks to InfoSouth (A Southern Forestry Information Service) at the Science Library of the University of Georgia at Athens. Their expertise at obtaining both common and obscure references has helped to both build this bibliography and correct slight inaccuracies incurred from published bibliographies or references cited sections. Dozens of entries were obtained in September of 2004 from the National Archeological database at:

<http://www.cast.uark.edu/other/nps/nadb/nadb.mul.html>
