

2010 Summer Internships in Nanomaterials Research

Overview: An opportunity for high school students to participate in nanoscience and engineering research at the University at Buffalo.

Summer research program:

- Engage in research on nanomaterials science and engineering
- Interns will work under the guidance of UB science and engineering faculty and graduate students.
- Interns will participate in a weekly seminar series.
- Schedule: 6 weeks (Weds. July 7th through Fri. August 13th, 2010)
- Interns will receive a stipend; transportation will be subsidized.

Application information:

- Applications online: <http://wings.buffalo.edu/research/watson/>
- Application deadline: **Wednesday, May 26th, 2010**
- For more info. contact Prof. David Watson, UB Dept. of Chemistry:
email: dwatson3@buffalo.edu, phone: 716-645-4189
